

## **NHS BORDERS HEAT PERFORMANCE SCORECARD – JULY 2013**

### **Aim**

This paper aims to update the Board with NHS Borders latest performance towards the 2013/14 national Health Efficiency Access & Treatment (HEAT) targets, as set out in NHS Borders Local Delivery Plan. The attached HEAT Performance Scorecard shows performance as at 31<sup>st</sup> July 2013.

### **Background**

Strong Performance Management remains a key priority across NHS Borders to ensure robust monitoring of key local and national targets and priorities. Performance Scorecards are embedded across the organisation and individual services continue to implement their own scorecards with the assistance of Planning and Performance.

Attached to this paper is the July 2013 HEAT Performance Scorecard providing a summary of performance in July 2013.

Some areas of strong performance in the July 2013 Scorecard are highlighted below:

- Smoking cessation continues to perform well with the latest available data (May 2013) showing that the current target of 605 has been exceeded with 897 successful quits
- In the latest available data (May 2013), pre-operative stay continues to exceed the target of 0.68
- Online triage of referrals exceeded the 90% target
- The sickness absence percentage reduced to 3.87% under the 4% target
- Treatment of cancer within 31 days of decision to treat and treatment within 62 days for urgent referrals with suspicion of cancer performed at 100% during May 2013 (latest available data)
- 18 Weeks RTT overall performance continues to perform above the target of 90%
- There was only 1 delayed discharge over the new 2013/14 target of 2 weeks
- The Alcohol/Drug referrals into treatment within 3 weeks continues to achieve 100%
- Against a target of 0, there were no CAMHS waits over 26 weeks in June 2013 (latest available data)
- 99% of all attendees at A&E waited for less than 4 Hours above the target of 95%
- Based on the latest available data (February 2013) emergency admissions continue to reduce
- 100% of patients were admitted to the stroke unit within 1 day of admission in June 2013 (latest available data)

Please note, the SABs and C Diff targets have not been reported this month as the trajectory and reporting is currently being agreed for this year.

## Summary

NHS Borders Board Meetings will continue to receive the HEAT Performance Scorecard highlighting the organisation's performance towards the national HEAT Targets.

Planning & Performance are currently working with a number of departments to produce an integrated performance report containing a range of clinical, non clinical and financial performance. These new style reports will be introduced later in 2013/14.

## Recommendation

The Board is asked to **note** the July 2013 HEAT Performance Scorecard.

<b>Policy/Strategy Implications</b>	Regular and timely performance reporting is an expectation of the Scottish Government
<b>Consultation</b>	Performance against key indicators within this report have been reviewed by each Clinical Board and members of the Clinical Executive
<b>Consultation with Professional Committees</b>	See above
<b>Risk Assessment</b>	Good progress is being made against key targets, but emerging pressure areas are identified in this report. Continuous monitoring of performance is a key element in identifying risks affecting Health Service delivery to the people of the Borders
<b>Compliance with Board Policy requirements on Equality and Diversity</b>	The implementation and monitoring of targets will require that Lead Directors, Managers and Clinicians comply with Board requirements
<b>Resource/Staffing Implications</b>	The implementation and monitoring of targets will require that Lead Directors, Managers and Clinicians comply with Board requirements

## DASHBOARD OF HEAT TARGETS

The Dashboard of HEAT Targets shows the performance of each target against a set trajectory. So that current performance can be judged symbols are used to show whether the trajectory is being achieved. These are shown in the table below:

Current Performance Key			
	Under Performing	Current performance is significantly outwith the trajectory set.	Exceeds the target by 11% or greater
	Slightly Below Trajectory	Current performance is moderately outwith the trajectory set.	Exceeds the target by up to 10%
	Meeting Trajectory	Current performance matches or exceeds the trajectory set	Overachieves, meets or exceeds the target, or rounds up to target

So that the direction of travel towards the achievement of the target can be viewed direction symbols are also included in the dashboard. These are shown below:

### Direction Symbols

Better performance than previous month	↑
No change in performance from previous month	↔
Worse performance than previous month	↓
Data not available or no comparable data	-

## HEAT Targets

Every year the Scottish Government Health Department (SGHD) asks each Health Board to report to them on their performance and delivery plans for the next financial year. This report is called the Local Delivery Plan (LDP) and forms an agreement on what Health Boards will achieve in the next year with SGHD. Boards are asked to work towards a number of key targets for the year which fit with the Government's health objectives. These targets are called HEAT targets because they are separated under 4 different headings:

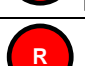

- H Health Improvement
- E Efficiency and Governance
- A Access to Services
- T Treatment for the individual

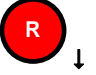

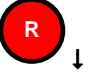

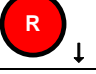

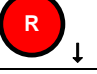

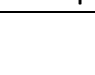

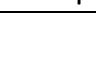

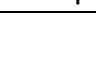

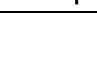

Planned work with local partners such as Scottish Borders Council is also included.

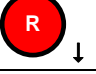

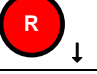

### Please note:

Some anomalies may occur in data due to time lags in data availability and national reporting schedules.

Performance on the HEAT targets and standards are detailed within in this report. The following table summarises the achievements for the financial year 2013/14 to date, the arrows indicate performance and direction of travel towards achieving targets compared to previous month:

<sup>3</sup> Due to verification processes for national reporting, there is a 1 month lag time for the data

<sup>4</sup> There is a lag time for Emergency admission aged 75 or over (per 100,000)

<sup>5</sup> This target is to be delivered over a 2 year period (2011/12 & 2012/13). Progress will continue to be closely monitored during 2012/13, performance indicator on monthly activity. The trajectory is still to be confirmed with the service therefore there is no RAG status

<sup>6</sup> No data supplied by the service for July 13.

Please Note: Work is ongoing to agree accurate reporting on SABs & CDiff targets. Updates will be included in the next Scorecard.
