

X-ray guide for Children

This is a picture of the
x-ray room.

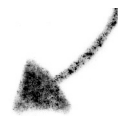

This is where you will
get your x-ray taken.

A radiographer will bring you in to the x-ray room to take your x-ray.

Your mum or dad can come with you.

one of the radiographers

The radiographer will get you ready for your xray.

Sometimes you will stand up to get your x-ray taken.

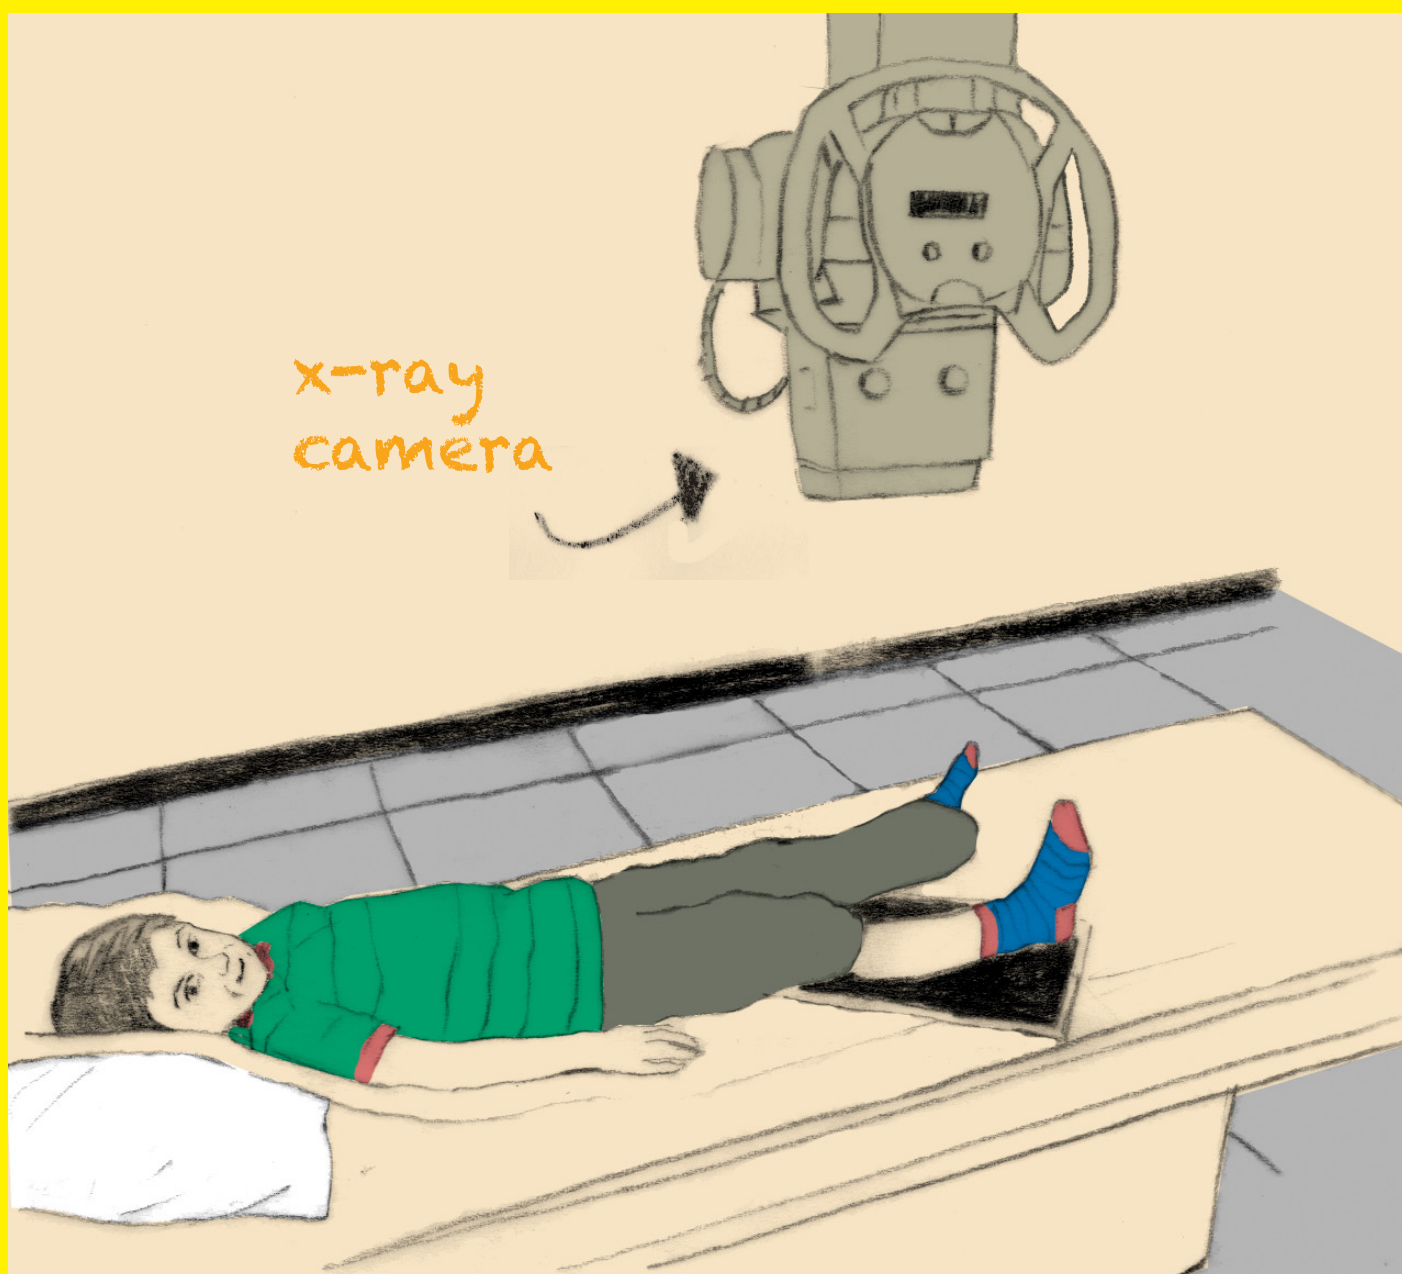

Other times you might sit down for your x-ray.

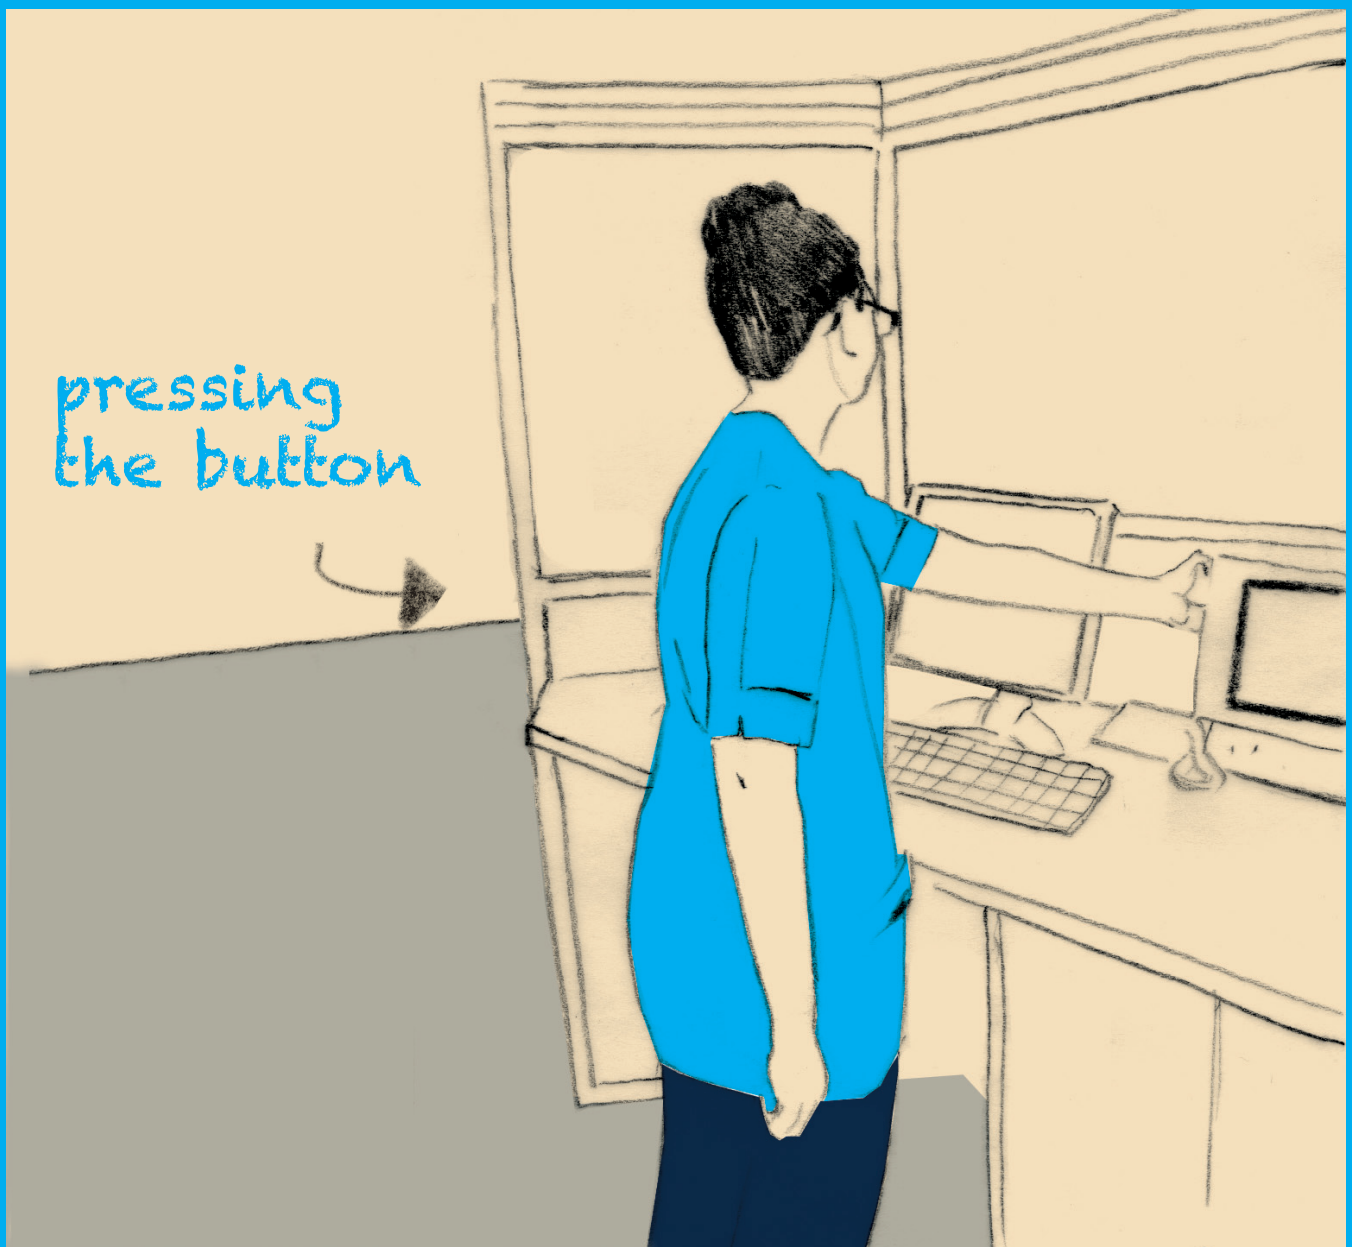

You might even get to lie down while you get your x-ray taken.

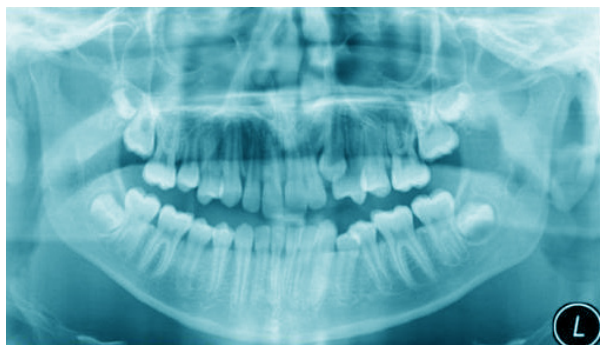

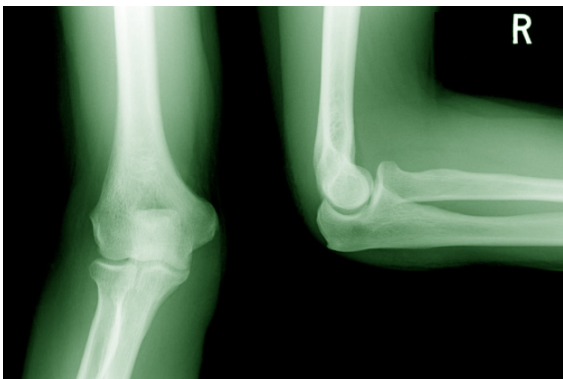

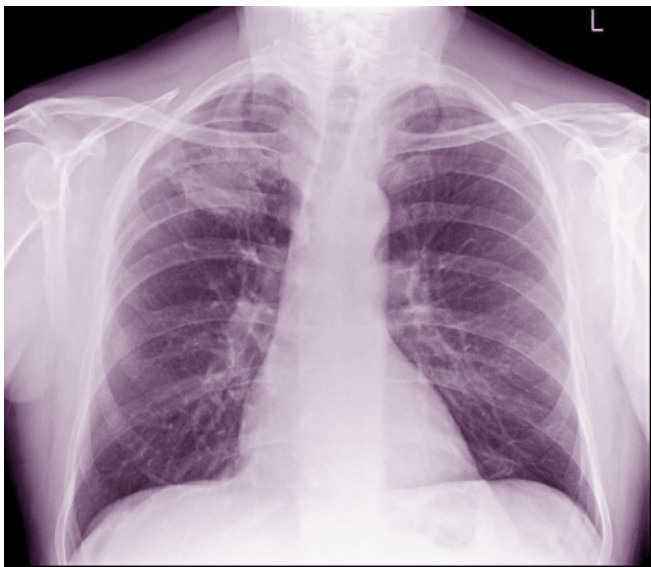

You will need to try and stay nice and still.

When you are in the right position the radiographer will press the button to take your x-ray. Just like getting your photo taken. Don't worry it doesn't hurt!

Here are some x-rays.
Can you tell what they are?

If you are good you will
get to choose a sticker!
