Freedom of Information request 266-15

Request

•   The top 100 internet sites accessed by employees using hospital computers between 1 January 2015 and 23 July 2015. If this information is only available for a shorter time period (i.e. only the last month) then that will suffice;

•   For each of the 100 websites listed above, please list the number of hits for each site (each time a page on that site was accessed).

Response

We operate an acceptable internet use policy which allows staff to access the internet for social purposes during official breaks and outwith core hours.

 Please find below a list based on the sites with the largest amount of data downloaded from them. It is not necessarily representative of those sites with the highest number of visits.

Our version of Internet Content filter does not have the capability to provide this information. Consequently we cannot answer the 2nd part of the request to list the number of hits for each site: this information is not available to us.

Only the top 85 sites have been provided as the remainder of the top 100 were unidentifiable IP addresses or included sub-domains that were amalgamated into the main domain shown above (e.g. images-amazon.com were included with amazon.com).
