Patient Group Direction for the supply of Chloramphenicol 0.5% eye drops to named patients registered with the Minor Ailment Service attending Community Pharmacies in NHS Borders

1. This Patient Group Direction relates to the following specific preparation:

preparation.	
Name of medicine,	Chloramphenicol 0.5% eye drops
Strength, Formulation	
Legal status	POM Prescription Only Medicine
Storage	Store between 2°C and 8°C
Dose	Adults and children 1 years and over - Apply one (1) drop at least every two (2) hours then reduce frequency as infection is controlled and continue for 48 hours after healing. Sleep need not be interrupted in order to administer the drops.
Route/method	Ocular
Frequency	Adults and children 1 years and over - Apply one (1) drop at least every two (2) hours then reduce frequency as infection is controlled and continue for 48 hours after healing
Total dose Quantity (Maximum/Minimum)	Maximum 5 days treatment (10ml bottle)
Advice to Patients	Supply Patient Information Leaflet.
	Contact lenses should be removed during period of treatment.
	Continue for at least 48 hours after the eye appears normal.
	Store in a fridge (between 2-8°), and keep cap tightly closed between applications.
	Discard 28 days after opening.
Relevant Warnings	Side Effects Occasional : Transient stinging on instillation.
	Rare : Allergic reaction (persistent burning, swelling of lids)

2. Clinical condition

2. Clinical condition	
Clinical Condition to be treated	Conjunctivitis will give the sensation of a gritty or itchy eye or eyes, with possibly a purulent discharge or crusting of the eyelid margins. It will only have been present for a few days and is not associated with any reduction in vision. The affected eye(s) will often look slightly red/infected, but this is not usually very marked. Pain is not a feature of simple conjunctivitis.
Criteria for inclusion	Presentation in Community Pharmacy with a need for treatment of symptoms of bacterial conjunctivitis, and registered for the Minor Ailment Service (MAS).
Criteria for exclusion	Patient not participating in MAS. Children under 1 year. Pregnancy, Breast feeding Known hypersensitivity to chloramphenicol, benzalkonium chloride or disodium edetate. Recurrence of symptoms within last three months
Action if excluded/ Referral criteria	Refer to GP Urgent Referral should also be made if patient presents with an eye - if painful, rather than itchy or gritty - if reduced visual acuity - if eye looks cloudy - if pus level visible in anterior chamber - if any history of trauma to eye, or grinding, immediately prior to onset of symptoms - if possibility of foreign body on/in eye - if history of welding without eye protection immediately prior to onset of symptoms - if no improvement within 48 hours - any signs of photophobia Routine referral should be considered if patient: - pregnant - breast feeding - present for more than 2 weeks despite self care measures with no urgent referral symptoms
Action if declines	Document refusal in PMR and if patient declines alternative management refer to the GP.
Interactions with other medicaments and other forms of interaction	Chymotrypsin will be inhibited if given simultaneously with chloramphenicol.

3. Records-A CP2 form should be generated and the consultation recorded on the Pharmacy PMR

1. The following records should be kept (either paper or computer based)

The GP practice

The patient name and CHI number

The medicine name, dose, route, time of dose(s), and where appropriate, start date, number of doses and or period of time, for which the medicine is to be supplied or administered. The signature and printed name of the approved healthcare professional who supplied or administered the medicine. Whether patient met the inclusion criteria and whether the exclusion criteria were assessed.

Quantity supplied / received and <u>current stock balance</u>

2. Preparation, audit trail, data collection and reconciliation-

Stock balances should be reconcilable with Receipts, Administration, Records and Disposals on a patient by patient basis.

3. Storage-Store between 2-8°C

4. Professional Responsibility -

- All Health Professionals will ensure he/she has the relevant training and is competent in all aspects of medication, including contra-indications and the recognition and treatment of adverse effects. He/she will attend training updates as appropriate.
- Pharmacist must be registered with the GPhC and contracted to provide the Minor Ailment Service.
- Sources of Evidence used for the PGD creation should be stated.
