## 1. Equality and the Gender Pay Gap

NHS Borders last year published Pay Gap data within its Ma instrea ming Report. This has now been separated and is published here in the format described in Closing the Gap - Guidance on Public Sector Equality Duty, last years data is included as an Annexfor Reference though is not strictly comparable as it wascompiled in a different way. The overall mean gap for 2015 and 2016, as stated calculated in a slightly different way, is also shown in the next paragraph for comparison.

The relevant calculations as described in Closing the Gap show a Median Gender Pay Gap in favour of men of $11.17 \%$ and a Mean genderpay gap of 20.47\%. (in 2015 the gap was 20.87\% and in 2016 it was 19.64\%). The marked difference in Median a nd Mean iscaused by the influence in the two statistic s of the small number of Medical Staff who are on higher salaries compared to the majority of staff.

In all quartiles there is a signific ant prevalence of female staff:
LowerQuartile: Male 19.98\% Female 80.02\%
Lower Middle Quartile : Male 15.05\%Female 84.95\%
Middle Quartile: Male 12.14\% Female 87.86\%
UpperQuartile: Male 24.95\% Female 75.05\%
However it can be seen that the higher percentages of male staff are in the Upper pay quartiles.

## Commentary

Medic al Staff: Many of the longer serving a nd more highly remunerated staff are still male as the increase in numbers of female medical staff a re still working through the system, in 1992 only $15 \%$ of the consultant body was female, that figure is now much closer to 60/40 in favour of women. and we have a increasing number of women (4 out of 5 Associate Medical Director) in senior positions, there are no shortage of role models.

Agenda for Change and Executive Grades: Although there is still a Gender Pay Gap 4/7 of the Board Executive Directors are female as are half of the General Manager level appointments, again many good examples of equal access.

## Total Number of Staff and Employments (Contracts)

|  | Total No of Staff | Total No of Employments |
| :--- | :---: | :---: |
| 2015 | 3220 | 3849 |
| 2016 | 3247 | 3554 |

| Gender | AFC |  | Medical |  |
| :--- | :--- | :--- | :--- | :--- |
|  | 2015 | 2016 | 2015 | 2016 |
| Female | $85.08 \%$ | $85.30 \%$ | $53.33 \%$ | $54.45 \%$ |
| Male | $14.92 \%$ | $14.70 \%$ | $46.67 \%$ | $45.55 \%$ |

## 2. Legislative Framework

The Equality Act replaces previous legislation, including the Equal Pay Act 1970 and the Sex Disc rimination Act 1975. The Equality Act's provisions on Equal Pay a nd other employment terms are determined without sex disc rimination or bias.
The Equality Act 2010 also introduced the concept of nine 'protected characteristics'. These are:

- Age
- Disability
- Gender Reassignment
- Pregnancy and Matemity
- Race
- Religion and Belief
- Sex
- Sexual Orientation
- Marriage a nd Civil Partnership

The Act stipulated that all Health Boards (as were all public bodies) a cross NHS Sc otland were required to comply with the three a ims of the Public
Sector Equality Duty, and to meet the requirements of the Equality Act 2010 (Specific Duties)(Sc otland) Regulations 2012.
The three aims of the Public Sector Equality Duty are to:

- Elimina te disc rimination, ha rassment and victimisation and a ny other conduct that is prohibited under the act
- Advance equality of opportunity between persons who share a relevant protected characteristic and those who do not
- Fostergood relations between people who share a protected characteristic and those who do not.

## 3. Equal Pay Statement

The Equal Opportunities Policy statement has to be reviewed on a regular basis by NHS Borders Area Partnership Forum and the Staff Govemance Committee. NHS Borders is committed to equality of opportunity in employment and believe that staff should receive equal pay for the same or broadly similar work, or work rated as equivalent and for work of equal value, regardless of their age, disability, ethnicity or race, gender reassignment, mantal or civil partnership status, pregnancy, politic al beliefs, religion or belief, sex or sexual orientation.

National Terms and Conditions: NHS Borders employs staff on nationa lly negotiated and agreed NHS contracts of employment which includes provisions on pay, pay progression and terms and conditions of employment. These include National Health Service Agenda for Change Contract terms and conditions of employment, NHS C onsulta nt and General Practice (GP), Speciality and Associate Specialist (SAS), Medic al Trainee and General Dental Practice (GDP) Educ ator contracts of employment. Some staff a re employed on NHS Sc otla nd Exec utive contracts of employment (Exec utive Cohort) which are evaluated using national grading policies with presc ribed pay ranges and tems of conditions of employment.

Staff Govemance Standard: NHS Boards work within a Staff Govemance Standard which is underpinned by statute. Staff Govemance Standards set out what each NHS Sc otland employer must achieve in order to continuously improve in relation to the fair and effective management of staff.

If a member of staff wishesto raise a concem at a formal level within NHS Borders relating to equal pay, the Grievance procedure is available for their use.

## 4. How NHS Borders is Using this Information to Inform its Policy on Equal Pay

The difference between men and women's pay has dec reased slightly during 2016 a nd shown a general consistency between 2015 and 2017. The difference between men and women's pay for the periods 2015 and 2016 was considered by NHS Borders Board during 2017 and The Executive Management Team and the Staff Govemance Committee have been informed of the difference between men and women's pay. It is expected that as female doctors reach the later stages of their careers the Median level and Mean level pay differential will reduce.

As mentioned previously the difference in pay between senior medical staff and the remainder of the workforce shows as a major pay gap warranting action. Despite that these 2 years show a continuing reduction in the overall gap from 2013-14. The breakdown shows that the AFC grades pay gap is weighted in favour of females.
