

Freedom of Information request 197-18

Request

- The number of patients diagnosed with psychosis or psychosis-related symptoms broken down by age, gender, ethnicity, and borough location under your NHS trust remit. I would like these figures to be as recent as possible, going back 3 years e.g. 2014-2017 if available.
- Could I also have the number of patients (from 2014-2017 or 2013-2016 if that is the earliest available) of patients sectioned for psychotic symptoms with the same census breakdown

I would like this information in spreadsheet form

NHS Borders do not record patient ethnicity, therefore under Section 17 of the FOI(S)A 2002 we do not hold this data.

- This information is not recorded electronically, this would be held in an individual's patient notes and to extract this data would exceed the limit set in the Fees Regulations of the FOI(S)A 2002 and we are therefore under Section 12 Cost of Compliance not required to do so.

As the number of events in some areas are very small and in accordance with the Code of Practice for Official Statistics any number that is less than five, actual numbers and potentially identifiable information is withheld to help maintain patient confidentiality due to potential risk of disclosure. Further information is available in the [ISD Statistical Disclosure Control Protocol](#).
