Please note that as NHS Borders is such a small Board the number of adverse incidents is small, and to provide further details of these could allow individuals to be identified and we would be in breach of the Data Protection Act 2018. We are therefore withholding all other data under Section 38(1)(b) of FOISA, as read with Section 38(2)(a)(i) or (b), information is exempt from disclosure if it is personal data, and its disclosure would breach one or more of the data protection principles contained in the DPA. This is an absolute exemption in that it is not subject to the public interest test contained in Section 2(1)(b) of FOISA. This is also in accordance with the Code of Practice for Official Statistics any number that is less than five, actual numbers and potentially identifiable information is withheld to help maintain patient confidentiality due to potential risk of disclosure. Further information is available in the [ISD Statistical Disclosure Control Protocol](#).

Further to the above exemptions, in line with Section 36(2) of the Freedom of Information (Scotland) Act 2002, to disclose further information relating to the incidents in the table above would constitute an "Actionable Breach of Confidentiality" as an individual's medical history is confidential.
