POST INFORMATION												
The Post	<p>The Department of Medicine for the Elderly (DME), within the Borders General Hospital, has a team of 6 Consultants covering both general and specialist areas in care of the elderly medicine. We currently have an opportunity for a consultant to join the DME Consultant team. The post is required as soon as possible as maternity leave cover to support the DME service including orthogeriatrics and general liaison as well as the general medical on-call rota. The post comprises 10 PAs per week but applicants wishing to work part-time are welcome.</p> <p>Successful applicants will be responsible, along with their colleagues, for the general care of patients in the Department of Medicine for the Elderly and, through close liaison with GPs and the primary health care team, the integrated management of elderly patients in a defined geographical</p>											

**POSITION: Locum Consultant Physician,
Medicine for the Elderly**

	<p>locality. They will also be expected to act as leads in the development and support of identified specialist services, according to their particular interests and the needs of the service. They will be expected to assist the moves towards integrated care for the Scottish Borders.</p> <p>Successful applicants will also be expected to contribute to on call for general medicine on an approximate 1:18 basis and to have ongoing responsibility for some of the general medical patients admitted under their care.</p> <p>This position provides a unique opportunity not only to develop and enhance the existing service for Medicine for the Elderly but also, working closely with Primary Care Health Services, to play a major role in the further development of both integrated and specialist elderly care in the community Borders wide.</p>												
Reporting Arrangements	You will report to the Head of Clinical Service, who will agree your job plan for the locum period.												
Health and Safety	You are required to comply with NHS Borders Health and Safety Policies.												
Training Grade Medical Staff	You will be responsible for the training and supervision of the Training Grade Medical staff (Foundation Trainees, GPSTs and Specialty Registrars) who work with you, and you will be expected to devote time to this on a regular basis. In addition, you will be expected to ensure that staff have access to advice and counselling.

Specialty Clinics at BGH include respiratory medicine, cardiology, gastro-enterology, diabetes, endocrinology, and haematology. There are visiting consultants in dermatology, renal and clinical genetics.	

NHS Borders Description	<p>The NHS Borders Board has an entirely integrated structure for management of health services. Decision-making is firmly embedded within an integrated Clinical Executive, part of a natural evolution towards more integrated care, which has seen health and social services within the Borders develop nationally recognised joint initiatives.</p> <p>The NHS Borders Board covers an area co-terminus with the local authority and has developed close and effective links with Scottish Borders Council, including the creation of a Joint Health and Care Partnership Board – key statistics:</p> <ul style="list-style-type: none"> (a) Size of Area – 1804 square miles (5.9% of the area of Scotland) (b) Population – 113,000 (2.2% of the Scottish population) (c) The area has 12 main towns i.e. with over 1,500 population, the largest being Hawick (14,573), Galashiels (14,361) and Peebles (8,065). However, some 30% of the population live outwith towns of 1,000 population or more (compared to Scottish average of 12%).

Medicine for the Elderly**

	<p>acute function. It encompasses the following one-stop clinics:</p> <ul style="list-style-type: none"> (a) Neurovascular (Commenced 1997) (371 new patients per year). (Consultant cover Dr Syme and Dr Kerr) - All transient ischaemic attacks and minor strokes are reviewed within 4 days of referral. CT scans and carotid dopplers are performed the same day of attendance. Specialist investigations, including transcranial doppler are performed as necessary. (Dr Syme). Secondary prevention of stroke is initiated including referral for carotid endarterectomy and patent foramen ovale closure. (Echo Contrast Studies – Dr Syme) (b) Syncope and falls (Commenced 1997) (479 new patients per year) (Consultant cover Dr Inglis / Dr Gordon / Dr Norris (locum), including investigation of carotid sinus hypersensitivity with full tilt table phlebysmography (190 patients per year) and Carotid Sinus Massage testing, for the investigation of syncope and falls. (c) Cardiovascular (Commenced 1998) (149 new patients per year) One stop clinic for predominately elderly patients with heart failure held fortnightly in the day hospital with same day echo cardiogram facility. Assessment of atrial fibrillation and management/stroke prevention with cardiac nurse specialist heart failure clinic in parallel. (d) Parkinson's (Commenced in 2002) (73 new patients per year). (Consultant cover Dr McLaren). We recently joined the PD Med Randomised Controlled Study on Parkinson's Disease aiming to determine most cost effective and reliable drug treatments for early and late stages of Parkinson's Disease. <p>In addition, urgent and emergency general assessments of the elderly are carried out.</p> <p>The day hospital also provides a venue for other clinics.</p> <p>The Day Hospital also acts as a resource and information centre for nursing support, with a monthly Parkinson's Disease drop-in clinic and availability of telephone advice for patients, carers and staff.</p> <p>Each consultant also has a fortnightly general medicine outpatient clinic in the main outpatients department / day hospital.</p> <p>The new post will support a twice weekly clinic for rapid access geriatric assessment.</p>
--	--

**POSITION: Locum Consultant Physician,
Medicine for the Elderly**

	<p>Stroke Services</p> <p>A specialist stroke multidisciplinary team has been established including physiotherapy, speech and language therapy, occupational therapy, dietician input and social work. Video fluoroscopy can be performed and there are fully developed rehabilitation facilities including hydrotherapy. Dr Susan Kerr is the clinical lead for stroke services. A full-time stroke coordinator is now in post.</p> <p>Dr Syme, Medicine for the Elderly Consultant and Senior lecturer, University of Edinburgh, has completed three years of a major research project funded by the Chief Scientist Office and Chest, Heart & Stroke Scotland, the Scottish Borders Stroke Study.</p> <p>A 2-year Designed Healthcare Initiative project resulted in a comprehensive strategy for stroke services in the Borders. A stroke/rehabilitation unit based (the Borders Stroke Unit) opened in 2004 and has recently moved to upgraded facilities. This is a key element of a comprehensive integrated stroke service throughout the Borders.</p> <p>NHS Borders views as a key priority the development of a robust and effective Managed Clinical Network for Stroke Services, in accordance with the CHD and Stroke Strategy for Scotland, and closely aligned to the newly established Borders Rehabilitation Network.</p> <p>Ortho Geriatric Service</p> <p>The orthopaedic unit has participated in the National Hip Fracture Audit for several years and is implementing the SIGN Guideline on Hip Fracture with the aim of involvement of Medicine for the Elderly physician from admission, linked with timely rehabilitation where appropriate in the Medicine for the Elderly unit. There are on average three hip fracture patients a week in the Borders General Hospital. Currently a DME consultant provides a thrice weekly liaison service including leading the MDT meeting. The new post will support the development of this service.</p> <p>Dementia Services</p> <p>There is a well established Mental Health for the Older Adult Team (MHOAT) covering the Borders region with medical cover provided by Dr Paul Morris, full-time Consultant in Old Age Psychiatry, Dr Gill Yellowlees, part-time Consultant, Dr Ingrid Swan, part-time Consultant and full supporting team. Inpatient care is provided in a 24-bedded dementia assessment unit (Cauldshiels) within BGH and a Continuing Care Unit (Melburn Lodge) on BGH site. MHOAT and dementia specialist nurses link closely with the DME assessment / stroke wards.</p>

**POSITION: Locum Consultant Physician,
Medicine for the Elderly**

Young Physically Disabled

This is a specialist assessment and rehabilitation service, including post-head injury and spinal cord injuries, younger patients with severe stroke and chronic neurological disabilities.

Although patient numbers are small, these patients require intensive medical, nursing and support input.

Community Links

In addition to the informal links each consultant has developed with the GPs and community teams in their relevant geographical areas, there are well-established formal links between the Department of Medicine for the Elderly and community health services and social work.

- Weekly visits to Community Hospitals and Day Hospitals enable reviews of GP acute and slow stream rehabilitation patients and for multidisciplinary team meetings to take place.
- Consultants in the Department of Medicine for the Elderly participate in numerous Borders-wide groups involved in providing health and social care for the Borders population
- The *Clients Choice* project (1998-2000), was a 2-year social work funded programme that demonstrated that NHS continuing care can provide effective slow-stream rehabilitation to discharge home (39% - mean length of stay 12 weeks) and reduce long-term institutionalisation (5%). The report was accepted as an example of good practice by the Audit Commission for Scotland. The Scottish Health Advisory Service inspection visit in February 2000 commented that this was “very highly regarded and an example of good practice”.

Clients Choice demonstrated the effectiveness of joint working between Consultants, GPs and Community Hospital staff. Although still active within Kelso Hospital, it is anticipated that the working patterns developed within the project could be replicated.

Network Links

The Department has specialty registrars on rotation with Edinburgh and also accepts medical students from Edinburgh. There are postgraduate meetings at the Department of Geriatrics in Edinburgh and Stroke

**POSITION: Locum Consultant Physician,
Medicine for the Elderly**

	<p>research meetings take place at the Western General Hospital.</p> <p>The Department also has good links with the Northumberland Parkinson's Disease Network, which is working towards Managed Clinical Network status. There are also good academic links with Newcastle University through membership of the Northern Syncope Group.</p> <p>We also have good links with the Parkinson's Interest Group in Edinburgh. The stroke MCN has good links with the units in Edinburgh.</p> <p>Departmental Special Interests</p> <p>The following are special interests identified as required to maintain and develop the current service. The Department would welcome and do their best to accommodate other special interests that postholder would bring to the service.</p> <p>Cardiovascular Disease - involves management of elderly patients with heart failure (1 clinic per fortnight). Member of CHD Strategy Group, working towards development of CHD Managed Clinical Network.</p> <p>Stroke – Dr Kerr provides the lead physician role in relation to stroke inpatients, stroke team follow-up and development of stroke services in the Borders. Services include a neurovascular clinic held within the Day Hospital and a specialist Transcranial Doppler clinic, for diagnostic assessment, bubble tests and collateral flow estimation.</p> <p>Parkinson's – Commenced in 2002 (73 new patients per year). We recently joined the PD Med Randomised Controlled Study on Parkinson's Disease aiming to determine most cost effective and reliable drug treatments for early and late stages of Parkinson's Disease.</p> <p>DATSCAN facility is available since 2004 to aid the diagnosis of Parkinson's Disease, as required.</p> <p>Falls / orthogeriatrics / osteoporosis – The successful applicant will be expected to support development of the orthogeriatric service. Involvement in developing post-hip fracture rehabilitation, including early supported discharge. They will participate in the development of an Osteoporosis network for Borders patients, take a role in establishing pathways and implementing guidelines for frail elderly trauma patients, allowing all DME consultants (and other clinicians) to manage these patients more effectively.</p>

Borders General Hospital

The Borders General Hospital is the district general hospital serving the Scottish Borders Region. It has 285 beds with 87 acute medical beds of which 12 are in a higher dependency area with monitoring and telemetry facilities. The hospital offers services in General Medicine, Haematology, Palliative Care, Medicine for the Elderly, Stroke Medicine, Paediatrics, General Surgery, Orthopaedic Surgery, Ophthalmology, ENT, Obstetrics and Gynaecology. There is a 6 bedded ITU and an active outreach programme for critically patients. A very recent development is the opening of the Margaret Kerr Unit in January 2013 has provided palliative care services in the Scottish Borders with a purpose-built environment from which to deliver specialist palliative care.

Within the Department of General Medicine there are specialists in Cardiology, Respiratory Medicine, Diabetes and Endocrinology, Gastroenterology, Neurology and Rheumatology. Visiting consultants provide clinics for Oncology, Dermatology, Renal Medicine and Clinical Genetics.

The Emergency Department provides facilities for the reception, resuscitation, examination and treatment of patients in the Scottish Borders who require emergency admission, or immediate care and discharge. The ED service is well integrated with the Borders Emergency Care Service (BECS), which is the Primary Care out-of-hours service for Borders. The department is managed by a consultant emergency physician, Mr J Kerr, who was appointed in November 2008. Specialty Doctors, Salaried GPs, training grade doctors (FY2s, GP, orthopaedic and surgical trainees) manage ED patients supported by speciality medical staff from within the hospital. Nurse staffing within the ED is comprised of 23 registered nurses and 3 nursing assistants led by a senior charge nurse.

There is a 6 bedded ITU run by the Anaesthetic Department who also run an acute haemodynamic support service with outreach staff from ITU liaising with ward staff.

There is an up to date laboratory service covering Haematology, Microbiology and Clinical Chemistry with ready access to more specialised investigations in Lothian laboratories and other laboratories in Scotland. The Radiology Department is well equipped for routine radiology, CT scanning, ultrasound, Doppler studies, nuclear medicine and MRI. CT coronary angiography and cardiac MRI are well established in the department.

There is an active post graduate programme under the direction of the Director of Medical Education, Dr Jane Montgomery, with excellent facilities in the Educational Centre operated by Napier University.

**POSITION: Locum Consultant Physician,
Medicine for the Elderly**

Educational Facilities

There is an excellent library within the Borders General Hospital grounds run by Napier University with good Internet access. Post graduate and continuing medical education is actively encouraged and supported by Dr Roddy Campbell, Director Medical Education. There is an extensive postgraduate programme including weekly educational/audit meetings within the Department of Medicine Elderly and Department of Medicine, weekly X-ray meetings, monthly educational half days and a monthly peer review meeting. There is a monthly educational/audit stroke team meeting and a monthly radiology/stroke team meeting

The Borders General Hospital is a teaching unit for undergraduate students in medicine. Appointed consultants act as educational supervisors for individual students attached to different teams.

The Scottish Borders

The Hospital is situated on the outskirts of Melrose in the Scottish Borders. The Borders covers a large and scenically beautiful area of the Southern Uplands of Scotland. Predominately rural, it is historically a unique part of the country, the home of the Border Reivers, where annually each town in the Borders maintain its links with the past during the season of Common Ridings. Seven-a-side rugby originated in Melrose, and the Melrose event in particular draws large crowds each year. The Borders has tremendous facilities for sport and leisure. Glentress and Innerleithen mountain bike parks are world renowned for both cross country and down hill biking. The beautiful Berwickshire coast provides options for sea kayaking, surfing, diving and sea fishing. In addition there are facilities for fishing, golf, swimming, horse riding, cricket, football, hiking and many other activities. The Borders has excellent cultural opportunities in terms of music and art societies, drama, and small theatres in Melrose and Selkirk as well as amateur opera. There are excellent restaurants, cinemas and shops. The Hospital also has corporate membership of an excellent Fitness Centre in Galashiels. There is a purpose built nursery in the grounds of the hospital for hospital employees' children.

The Scottish Borders offers all the benefits of rural life with very easy access to major cities such as Edinburgh (37 miles) Glasgow (75 miles) Newcastle (75 miles). Edinburgh is renowned for its cultural activities in music, including opera and ballet, theatre, cinemas (including a film theatre) and visual arts, and of course every year there is the world famous Edinburgh International Festival and Fringe Festival. Glasgow also runs an annual festival in the early summer.

After an absence of almost 50 years, the Borders Railway has now opened, with train services to central Edinburgh running every thirty minutes (journey time 50 minutes approx). Tweedbank Station is a few minutes walk from the Borders General Hospital. On opening the railway Her Majesty Queen Elizabeth said "The Borders railway brings so much promise for sharing and invigorating this most beautiful countryside as a place to

**POSITION: Locum Consultant Physician,
Medicine for the Elderly**

work, live and enjoy. There are rail links to the rest of the country at Berwick Upon Tweed, and Carlisle and there is easy access to Edinburgh Airport (approximately 1 hour 15 minutes) and Newcastle Airport (approximately 1 hour 30 minutes).

As part of our policy there is assistance with temporary housing costs and relocation allowances if applicable.

Possession of MRCP or an equivalent certificate, is essential and you should be fully registered with the General Medical Council with a licence to practice and preferably your name should appear in the Specialist Register for both Geriatric Medicine and General Internal Medicine. vi. The person appointed may be expected to take part in the undergraduate and postgraduate teaching programmes. vii. The person appointed will have a continuing responsibility for the care of patients in his or her charge and will undertake the administrative duties associated with the care of his or her patients and an appropriate share in the running of the clinical department. viii. The appointment will be superannuable and subject to the regulations of the National Health Service. Superannuation Scheme and the remuneration will be subject to deduction of contributions accordingly, unless the appointee chooses to opt out of the Scheme. ix. It is a requirement that the private residence of the person appointed shall not be more than 30 minutes travelling time by road from the Borders General Hospital unless specific approval is given.
------------------------------------	---

**POSITION: Locum Consultant Physician,
Medicine for the Elderly**

	<p>x. NHS Borders is legally liable for the negligent acts or omissions of the employees in the course of their NHS employment. Medical staff are however advised to ensure that they have defence cover for activities not covered by the Board's indemnity.</p> <p>xi. All entrants to the NHS Borders must be certified medically fit and the appointment is conditional on such certification. Arrangements for medical screening (usually by questionnaire) are the responsibility of the Occupational Health Service.</p> <p>xii. Termination of the appointment will be subject to a 3 month notice period of notice on either side in accordance with the terms and conditions of service.</p> <p>xiii. For locum appointments assistance will be provided with temporary accommodation costs if required. Depending on circumstances support for relocation may be available for successful candidate in accordance with NHS Borders' Relocation Policy.</p> <p>xiv. NHS Borders operates a No Smoking Policy. It is a condition of your employment that you must not smoke whilst you are on duty. Failure to observe this rule could result in disciplinary action. When selecting new staff, NHS Borders does not discriminate against applicants who smoke but applicants who accept an offer of employment will, in doing so, agree to observe the Board's policy on smoking.</p> <p>xv. NHS Borders Equal Opportunities Policy affirms that all employees should be offered equal opportunities in employment, irrespective of their age, gender, marital status, race, religion, creed, sexual orientation, colour or disability.</p> <p>xvi. The Ionising Radiation (Protection of Persons Undergoing Medical Examinations) Regulations 1988 will apply to this post.</p> <p>xvii. The holder of this post may be required to undertake on a regular basis or occasional basis exposure prone invasive procedures (EPPs). As this could potentially place patients at risk, candidates must show evidence of immune status to HEPATITIS B, or agree to undergo the necessary procedures.</p> <p>xviii. It should be noted that the offer of appointment is subject to confirmation that the successful candidate is HEPATITIS B immune. This is checked by the Occupational Health Service.</p>
